

John Paulo B. Lumagbas

Entry-Level Software Engineer | Computer Engineer

Biñan City, Laguna, Philippines | +63 938 061 9032 | johnlumagbas23@gmail.com

Portfolio: paulumagbas.github.io | GitHub: github.com/paulumagbas

PROFESSIONAL SUMMARY

Computer Engineering graduate (2026) with front-end design experience and basic web development knowledge (HTML, CSS, JavaScript), two web-focused internships, and real-time technical troubleshooting experience in a fast-paced production environment. Skilled at documenting work and collaborating with teams to deliver on requirements and feedback. Currently building SQL skills and a public portfolio, and eager to contribute to a software engineering team as a fast, reliable learner.

TECHNICAL SKILLS

- **Web Development:** HTML, CSS, JavaScript, Front-End Design, Website Layout and Page Structure, UI/UX Prototyping (Figma)
- **Programming and Data:** SQL (fundamentals, currently learning), Microsoft Excel and Google Sheets (SUM, IF, COUNTIF, SUMIF, XLOOKUP)
- **Tools and Practices:** GitHub, GitHub Pages, Technical Troubleshooting, Technical Documentation, Software and Equipment Support
- **Professional:** Problem-Solving, Analytical Thinking, Attention to Detail, Collaboration, Communication, Time Management, Adaptability

WORK EXPERIENCE

Livestream Assistant

PH Waveseason Cosmetic Corp. (Time Phoria), Taguig, Metro Manila | April 23, 2026 - August 30, 2026

- Managed and maintained livestream equipment and software, troubleshooting technical issues in real time to keep broadcasts running without interruption.
- Started and ended livestream sessions and ran technical checks before and during broadcasts to keep sessions on schedule.
- Recorded daily livestream sales in Microsoft Excel and Google Sheets and consolidated them into weekly and monthly sales reports to monitor business performance.
- Maintained accurate business records and documentation, checking daily figures to keep them consistent and complete.
- Stepped in to cover live hosts when needed and coordinated with hosts and supervisors on daily sessions and ad-hoc tasks, ensuring continuity of operations.
- Supported hosts during live sessions by handling technical aspects and product displays.

INTERNSHIP EXPERIENCE (ON-THE-JOB TRAINING)

Web Developer and Designer

CTP Asean Tower, Alabang, Muntinlupa, Metro Manila | July 2025 - September 2025

- Assigned to front-end design; created website layouts and prototypes in Figma based on project requirements.
- Collaborated with the team on design revisions, applying feedback to improve usability.

Web Developer and Designer

DepEd Division of Biñan City, Biñan, Laguna | August 2024 - October 2024

- Worked on the front-end design of the Alternative Learning System (ALS) website under the Curriculum Implementation Division, using Figma.
- Supported website content organization and page layout to make information easier for users to find.

PROJECTS

Personal Portfolio Website

paulumagbas.github.io

- Published and maintain a personal portfolio website on GitHub Pages, featuring a case study on sales reporting.
- Managed site updates and file deployment through a GitHub repository.

EDUCATION

Bachelor of Science in Computer Engineering

Polytechnic University of the Philippines, Biñan Campus, Biñan City, Laguna | 2022 - 2026
